Situation Report: Disposition of Aircraft at El Obeid Airfield, El Obeid, Sudan

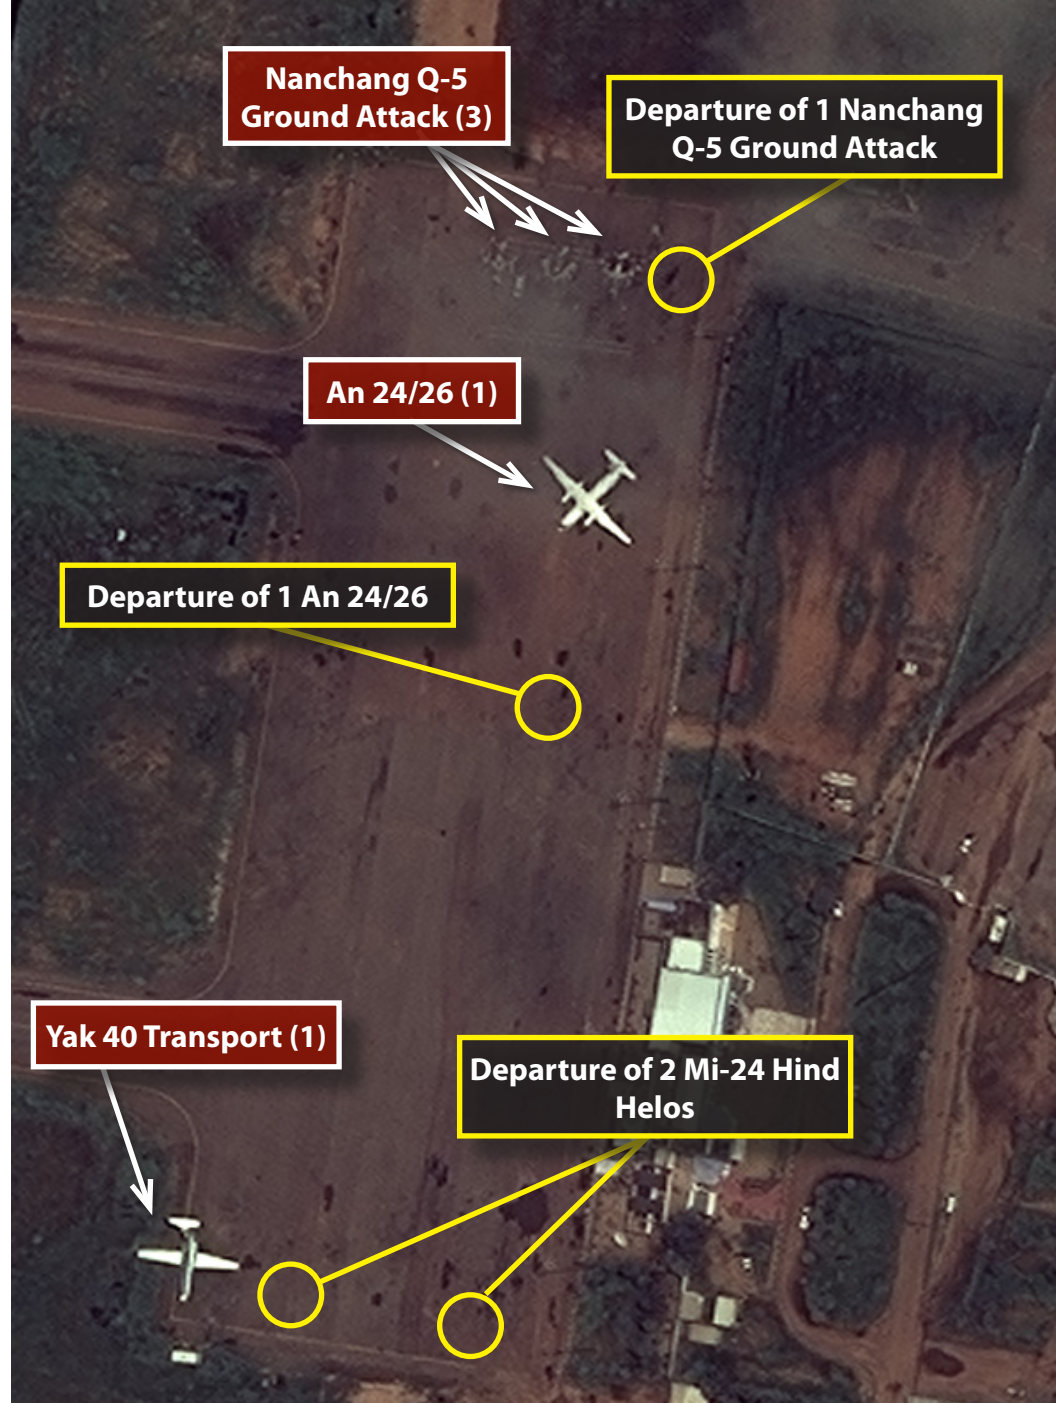

August 2012

Disposition of Aircraft at El Obeid Airfield

Most of the El Obeid Airfield was cloud-covered on August 15, 2012, but a small break in the clouds over the Sudanese Air Force operations parking ramp revealed at least three Nanchang Q-5 ground attack aircraft, two Antonovs and one Yak-40 transport. Two MI-24 Hind helicopters, present on August 9, 2012, were absent on this image taken at 9:47 a.m. local time. One Antonov might have experienced a repair problem and was moved to a parking position off the hard-surface apron.
